

Overview:
Reviewing and Revising Parts
to ensure they are using the desired GL Accounts

What's the purpose of this setup step?

This step gives you an overview of how Cyrrious Control enables you to account for parts and to track inventory. Additionally, it helps you know whether to set this up now, to come back to it after your system is up and running or to skip it altogether.

Read through the decision tree and choose the scenario that most closely matches how you want to use Cyrrious Control in your business.

Should you do this setup step? Follow the recommendation in the decision tree. It's time for you to go the next step. Which one is appropriate for your business?
